## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment, which places this application in condition for allowance. During a telephone conversation conducted on November 20, 2006, Andreas Grubert (Reg. No. 59,143) requested an extension of time for 2 MONTHS and authorized the Director to charge Deposit Account No. 50-2148 the required fee of \$450.00 for this extension and authorized the following examiner's amendment.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 10,

line 12 - - ( (c) depending on the comparison in Step (b)  
determining a correct access authorization, a fault in the energy  
supply or the first line, or an external manipulation of the  
identification device holder; ) - - has been added after the term  
"network;"

line 13 -- ( c ) has been changed to -- (d) --

In claim 11,

line 2 -- ( d ) has been changed to -- (e) --

In claim 12,

line 2 -- ( e ) has been changed to -- (f) --

### ***Response to Arguments***

Applicant's response to the drawing objections is fully responsive and therefore the previous drawing objections are hereby withdrawn.

Applicant's arguments, filed 10/10/2006, have been fully considered and are persuasive. The previous rejection has been withdrawn.

### ***Allowable Subject Matter***

Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: Janssen teaches a device for protecting a motor vehicle against theft,

comprising: an Identification device holder (item 30) which is connected via a first line to an energy supply (5 volts see Fig. 7) and comprises a first switch (item 31), a resistance network (item 41) arranged in the first line of which the elements comprise a defined resistance encoding (column 7 lines 25-35), and a control unit (item 46 also taught to be a microcontroller see column 7 lines 35-45) arranged in a motor vehicle, which comprises a diagnosis and evaluation unit which is connected to at least one tap (item 51) of the resistance network and which, evaluates the voltage drops over the elements of the resistance network. Janssen does not teach the use of the second switch to enable the measurements of the resistor values, not does Janssen teach depending on the position of a second switch determining a distinction between a correct Access authorization, a fault in the energy supply or the first line, and/or an external manipulation of the identification device holder. At least these further limitations to claims 1, 10 and 13 are not taught or rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
